

# PREMIUM CRACKED CELL CHLORELLA

## Nature's "Healthy Cell" Food

NON-GMO

KOSHER

VEGAN

GLUTEN - FREE

SOY-FREE

DAIRY-FREE

PALEO-FRIENDLY

Pure Planet Cracked Cell Chlorella is cultivated in a controlled outdoor environment in ponds filled with mineral-rich water. Our easily-digestible tablets and powder are a great addition to any cleansing regimen. We recommend combining it with any of our green foods for a smoother taste and added nutritional benefits.

- Can help break down heavy metals
- Is nature's richest whole-food source of chlorophyll
- May help decrease plaque buildup in arteries
- May support healthy cholesterol levels

### SUGGESTED USE:

Take fifteen tablets (3g) per day or take one rounded teaspoon (3g) of the powder mixed with juice, purified water or blended with a smoothie.

### Supplement Facts

Serving Size 15 tablets (3g)

Amount Per Serving	%Daily Value*
Calories 15	
Protein 2g	
Cracked Cell Chlorella 3g (Chlorella vulgaris)	†

\* Percent Daily Values are based on a 2,000 calorie diet.

† Daily Values not established.

### INGREDIENTS:

Chlorella powder

PRODUCT	SIZE	ITEM	SKU	CASE	WHOLESALE	MSRP
Cracked Cell Chlorella	300 tb (200 mg)	88500	091401885006	12	8.95	14.95
Cracked Cell Chlorella	600 tb (200 mg)	88501	091401885013	12	16.95	28.25
Cracked Cell Chlorella	4oz powder	88502	091401885020	12	12.75	21.25

**Pure Planet's Cracked Cell Chlorella** is a single cell algae with a hard cell wall that replicates faster than any other organism. It is the most ancient aerobic life form still on Earth today and is nature's richest whole food source of chlorophyll.

**Why we offer Chlorella:** Pure Planet wanted to give people access to this amazing superfood in a convenient form so they would be able to easily consume it on a daily basis.

Chlorella contains unique phyco-chemicals that are unavailable from any other plant, and is especially high in chlorophyll which is where it gets its name. Chlorella contains a unique RNA (Ribonucleic acid) that is known as the "Chlorella Growth Factor."

**Interesting Facts:** Chlorella must be "shattered" in order to break through its hard outer shell and make its phyco-nutrients bioavailable to humans. It is 50% protein and contains a wide variety of nutrients, including antioxidants and valuable minerals. Chlorella provides more chlorophyll (1.7 to 3 percent) than any other food.

**History:** Chlorella was one of the first stabilizing elements on planet Earth. It created the initial atmosphere through its photosynthetic activity (oxygen and ozone are the result of photosynthesis). Only after chlorella proliferated on the earth was it possible for aerobic life forms that rely on oxygen gas to exist.

Today, green plants are the sources of life, not only because of oxygen, but because of the nutrients that green leaves contain which feed microbes, insects, animals and humans alike.

Chlorella was reintroduced to the scientific community by Japanese and German scientists who were seeking unique sources of food that could be cultivated in water and under controlled conditions. Ultimately chlorella's therapeutic benefits made it the bestselling nutrition supplement in Japan that it is today.

**Potential Benefits:** The RNA in Chlorella is scientifically proven to protect cells from mutation and help normalize and regulate cell growth. The shattered Chlorella supports the cleansing of heavy metals and dioxins. Chlorella also assists in the metabolism of fat.

**How it is made:** Chlorella is cultivated under strict scientific methods in controlled ponds, it is harvested, dried and the cell wall is shattered, making the vital nutrients inside highly bioavailable and effective.

## High Chlorophyll
