

MASTER AMINO ACID PATTERN

The Ultimate Vegan Protein Source

NON-GMO

VEGAN

GLUTEN-FREE

SOY-FREE

DAIRY-FREE

PALEO-FRIENDLY

Master Amino Acid Pattern™ is pre-digested 100% vegetarian protein that has been featured in the Physicians' Desk Reference and is comprised of non-soy legumes. For fitness goals, we recommend combining it with any green drink.

- Aids in normalizing protein synthesis
- Assists with the stabilization or recovery of muscle strength, endurance, and volume
- Helps keep body tissues firm
- Helps minimize body fat
- May support a weight loss regimen

SUGGESTED USE: Take 5 tablets daily. As an exercise aid take 5 - 10 tablets, 30 minutes prior to exercise. For those seriously intent on gaining muscle or losing weight, take 1-2 tablets per every 25 lbs of body weight on a daily basis.

For best results: Take 2 hours BEFORE or at least 3 hours AFTER taking other protein/amino acid sources (meat, eggs, dairy, gelatin, beans, bananas, lentils, nuts, grains, breads, cereals, oatmeal, soy products, etc.).

INGREDIENTS: Patented proprietary blend of (non-soy) legumes (containing: L- Leucine, L- Valine, L- Isoleucine, L- Phenylalanine, L- Threonine, L- Methionine, L- Tryptophan, L- Lysine.)

Supplement Facts

Serv. Size: 5 tablets (5g)		
Amount Per Serving		% DV*
MAP® Patented proprietary blend		5000 mg†
L- Leucine		L- Valine
L- Isoleucine		L- Phenylalanine
L- Threonine		L- Methionine
L- Tryptophan		L- Lysine HCl

Pure Planet's MAAP (Master Amino Acid Pattern) is a pure, vegan protein that is predigested and contains no soy, GMOs, or additives of any kind.

Why we offer MAAP:

Pure Planet believes that vegans and vegetarians can have strong, lean, muscular bodies without consuming any animal flesh or animal byproducts. We believe that this patented product can be an essential tool for healthy aging, weight loss and safe bodybuilding practices.

Interesting Facts:

MAAP is in the Physicians' Desk Reference with over 30 published clinical studies proving its effectiveness. It is prescribed by doctors to those with renal failure and those on dialysis machines because it does not burden the liver or the kidneys at all. It is used in hospitals to prevent muscle wasting for those who suffer from paralysis or are comatose. MAAP passes through lymph fluid bypassing the blood, and unlike other protein sources it leaves behind no uric acid. MAAP is 99.9% utilized in cell metabolism and therefore only produces 1% nitrogen catabolites (metabolic toxic waste) compared to other dietary proteins which release an average of 68% nitrogen catabolites. This also means that 99% of MAAP constituent amino acids act as precursors or "building blocks" for Body Protein Synthesis (BPS), to become the body's constituent proteins. Meanwhile, other dietary proteins and protein supplements provide a BPS of 16 – 32% NNU and are therefore 3 to 6 times lower compared to MAAP. Other protein sources also create uric acid (high levels of uric acid can lead to gout or kidney disease) and need 3 – 6 hours to be digested. MAAP is absorbed in the small intestine within 23 minutes from its ingestion.

History:

Throughout history, man has required protein for energy, endurance, and muscle-building. Early man relied primarily on animal flesh as a source of protein. However, as certain societies developed unique cultural and religious norms they became averse to eating animals and sought vegetarian sources of protein such as seeds, nuts, beans, and legumes. Not until the patented MAAP was introduced has man found the perfect source of vegan protein; MAAP is far more digestible and assimilable than other sources of protein and much safer than animal sources.

Potential Benefits:

MAAP is clinically proven to help reverse muscle wasting and to maximize protein synthesis. It also increases the elasticity of our skin, reducing sagging and wrinkles. It increases cell strength, minimizes body fat, improves mental stability, increases muscle volume and helps reduce muscle soreness. It does not cause any fecal residue. Perhaps most importantly, it provides a perfect protein source for those whose lifestyles or dietary requirements include avoiding the consumption of animal protein.

How it is made:

MAAP is made by a patented process using predigested protein from non-soy legumes. It contains no binders, fillers or excipients. It is a pure, vegan protein.
