Pure Planet's Plant Protein is a certified organic, vegan, and mostly raw blend of highly digestible greens, seeds and gluten-free grains that mixes easily with water or your favorite healthy beverage. Plant Protein is available in Vanilla Coconut, Strawberry / Mango and Light Chocolate Mocha.

Why we offer Plant Protein:

At Pure Planet we saw a genuine need for a high quality organic, gluten-free, vegan plant protein that was easy to digest and tasted good enough to mix with water. We wanted one that would be beneficial to both the extreme athlete and the extremely old.

Interesting Facts:

The United Nations has predicted a long shortage of quality plant proteins as populations rise, the cost of meat increases, and more people realize the health benefits of a vegan lifestyle.

History:

From the beginning of man's time on earth we have instinctively sought out protein to fuel muscles. While some societies grew to rely upon animal sources, others chose a plant-based diet and for them plant protein became a matter of survival.

Potential Benefits:

Pure Planet's Plant Protein is fantastic as a pre-workout or post-workout, muscle-building recovery drink or simply as a part of a nutrient-dense, low-calorie vegan diet. Plant Protein helps energize the body and reduce adrenal

fatigue. Plant Protein is far less stressful on your kidneys and liver due to its pH balanced protein properties.

How it is made:

Each ingredient was selected for its unique contribution to the Plant Protein formula. The pure, active, easy-to-digest ingredients are tested, weighed, blended, bottled, and distributed by Pure Planet directly to stores to ensure its quality and freshness.
