Did you know that you can lose up to 12 different minerals when you sweat? And that cramping, headaches and dehydration can all be caused by a lack of key trace minerals and electrolytes?

Sports Salts are important because the formula is specially designed to assist rehydration and minimize cramping. It is recommended for those who want all the therapeutic benefits of sweating without the potential side effects.

- Contains key minerals
- Loaded with vital electrolytes
- Helps reduce cramping
- Speeds recovery after physical exertion

SUGGESTED USE:

Take 2 capsules 30 to 60 minutes before yoga, sauna or workout.

INGREDIENTS: Pink Himalayan sea salt with added magnesium (as magnesium carbonate) and potassium (as potassium bicarbonate).

OTHER INGREDIENTS: vegetarian capsules.

Supplement Facts

Serving Size: 2 capsules (2000mg)

	Amount per Serving	% of DV
Potassium Bicarbonate	889mg	†
Magnesium Carbonate	667mg	†
Pink Himalayan Salt	444mg	†

† Daily Values (DV) not established.

Mineral Absorption Explained: 889 mg of Potassium = 390 mg of Potassium utilization
667 mg of Magnesium Carbonate is = 228 mg of Magnesium utilization. Sodium Content = 173 mg

Pure Planet Sports Salts is a unique health product that combines pure pink Himalayan salt with specific levels of potassium and magnesium.

Why we offer Pure Planet Sports Salts:

Hot yoga, saunas, and fitness programs like CrossFit are all escalating in popularity, and with the rise in amounts of sweat released there is a corresponding increase in headaches, body aches, cramping, and dehydration, as well as mineral deficiencies.

Interesting Facts:

The human body uses clean, unprocessed salt water to help control our blood pressure. The iodine in sea salt helps regulate our thyroid. The balance of potassium and magnesium are integral to energy and sleep regulation. Unlike many other sea salts that are derived by evaporating sea water, Himalayan sea salt comes from mineral-rich salt deposits left behind by ancient seas.

History:

Salt tablets have historically been used by athletes to combat cramping. Unfortunately, the previous versions did not contain the wide variety of minerals that the body truly requires. By using our infused Himalayan sea salt, Pure Planet overcame that hurdle and created a far more effective and comprehensive product.

Potential Benefits:

Sports Salts may help speed recovery from athletic activity. Sports Salts may also reduce cramping and headaches and assist with healthy perspiration and rehydration when taken prior to strenuous exercise and perspiration.

How it is made:

We rebalance pure Himalayan pink salts with an infusion of potassium and magnesium to create the ideal healthy perspiration/rehydration support for athletes.

Speeds Recovery.
Reduces Cramps.
